NEW RIVER HARBOUR, FOVEAUX STRAIT.

"Invercargill, 30th October, 1858.
"Sir,—The New River pilot having communicated to me the following information, I lose no time in forwarding the same to your Honor.

"1st, The pilot states that the channel at the entrance of the New River (in which, at low water springs, Mr. Thomson, chief surveyor, found from sixteen to eighteen feet two years ago) is gradually filling up, so that two months ago the pilot could only find nine feet, and about a fortnight ago only six feet.

"2nd, That a new channel (at present the only one) has opened up about two cables length to the north-west of the former one, in which the pilot found, when he last sounded fifteen feet at low water; where this channel now exists there were formerly only a few feet.

TENDER FOR RATIONS.

Provincial Secretary's Office,
New Plymouth, 22 December, 1858.

THE following Tender, the only one received, for the supply of Rations for the Provincial Gaol during the year 1859, is published for general information.

I have taken steps to apprise the commanders of the whalers which frequent the River of the change; which I trust may prevent them making an attempt to enter the River by the old channel, which attempt would certainly be attended with serious consequences to vessels of their draught.

"Strangers will not likely attempt to enter without a pilot; but as a recent instance occurred in which a stranger did so enter, I would respectfully suggest that, to prevent accident, all publicity should be

given to the above report.

"I indulge a hope that this new channel which has so suddenly made its appearance, and is much wider than the old one, will continue to increase in depth, and thus make the Port of New River much more easy of access than it has hitherto been.
